Ab Woche 33 1966 sind die Typenbezeichnungen mit einer sechsten Ziffer, 1 oder 2 ergänzt worden, woraus hervorgeht, ob der Wagen Links- oder Rechtslenkung hat.

1) Kpl. Motoren in Produktionsausführung werden nicht als Ersatzteil auf Lager geführt.

#### Austauschmotoren

B18A Ersatzteilnummer 496890-5  
 B18B und B18D Ersatzteilnummer 496892-1

Die Austauschmotoren werden ohne Schwungradgehäuse, Schwungrad, Thermostat, Wasserrohr, Rohrkrümmer, Kraftstoffpumpe, Anlasser, Zündverteiler, Lichtmaschine und Kurbelgehäuseentlüftung geliefert.

Übrige Daten über den Aufbau und die Verwendung des Katalogs sowie Erläuterungen der infragekommenden Abkürzungen siehe "Kataloganweisungen" unmittelbar nach dem Vorwort.

Die Anbringung der Schilder für Modell-, Motorbezeichnung usw. geht aus der nachstehenden Abbildung auf Seite 6 hervor.

### Katalogens uppbyggnad

Katalogen är indelad i de grupper, som framgår av registerbladet.

I början av varje grupp finns en innehållsförteckning.

Ett numeriskt register samt förteckning över satsförpackningar är placerade i slutet av katalogen.

### Katalogens användande

Om man vet var en detalj är placerad och vill ha reda på dess detaljnummer etc, går man till den grupp i vilken detaljen skall finnas upptagen. Med hjälp av gruppens innehållsförteckning söker man sig fram till den sammanbyggda enheten vari detaljen ingår. Obs! Olika varianter av samma aggregat kan förekomma. När man på bildsidan funnit detaljen och därmed detaljens pos-nr, går man över till samma pos-nr på motsvarande textsida, där data erhålles för beställning av detaljen.

Om man endast känner till en detaljs nummer och vill ha övriga data för beställning, går man till nummerregistret. När man i registret funnit detaljens nummer, får man på samma rad hänvisning till en viss grupp och sida. Hänvisningen leder till den textsida på vilken detaljnumret återfinnes i kolumnen "det nr". På samma rad som detaljnumret finner man övriga data för beställning.

Genom att från detaljens pos-nr gå över till samma pos-nr på motstående bildsida, får man veta detaljens placering och dess funktion i den sammanbyggda enheten.

### Vad man bör veta om textsidan

Textsidan är uppdelad i ett antal kolumner benämnda enligt följande:

1. "Pos"  
Positionsnumret utgör sambandet mellan en detaljs beställningsdata på textsidan och själva detaljen på bildsidan.
2. "Antal"  
Här anges antalet av en viss detalj inom den närmast högre enheten. I stället för antalsuppgift står ibland "erf" = erforderligt antal eller erforderlig längd. Beträffande ordet "erf" när det gäller exempelvis rör och slang som lagerföres per längdmeter, så har detta i nyredigerade kataloger ersatts av längder angivna i millimeter. Längderna har då angivits enligt följande exempel: Fr o m 1-99 millimeter "99 mm" och fr o m 100 millimeter och däröver "100". Förekommer sådana rör eller slangar av samma dimension på ett flertal ställen inom samma installationsgrupp (bildavsnitt), hänvisas till bilden där längden anges inom parentes i omedelbar anslutning till positionsnumret.
3. "Benämning"  
I denna kolumn anges den benämning som skall användas för detaljen i fråga vid beställning.  
  
Om en viss detalj ingår i en högre sammansatt enhet är detaljens benämning stegförskjuten åt höger i förhållande till den sammansatta enhetens benämning. Vid köp av den sammansatta enheten medföljer de detaljer, som är stegförskjutna till höger i förhållande till den sammansatta enheten.
4. "Det nr"  
Detaljnumret skall oavkortat användas vid beställning.
5. "Anmärkning"  
Förutom sidhänvisningar innehåller denna kolumn förtydligande uppgifter av olika slag samt i vissa fall uppgift på främmande leverantörs detaljnummer. Ett i denna kolumn överstruket detaljnummer anger att detaljen ersatts av vidstående nummer i detaljnummerkolumnen. Denna ersättning gäller endast berörd katalog och pos.

Detaljer som ingår i en satsförpackning har markerats med "S". Detta har placerats omedelbart till vänster om detaljnummer-kolumnens vänstermarginal.

Ett lodrätt streck i textsidans vänstra marginal, markerar var ändring ägt rum vid senaste sidbyte.

#### Vad man bör veta om bildsidan

Bildsidans illustrationer utgöres som regel av perspektivteckningar. I vissa fall används plan- och sektionsbilder från ritnings-underloget. Stegförskjutningsprincipen, se textsida, punkt 3, kan man även spåra i bilden på så sätt, att komplettdetaljs pos-nr med en klammer omsluter underdetaljernas.

Komplettenhet markeras även med en ring omkring ett pos-nr.

#### Vad man bör veta om registret

Gruppen "register" är indelad i två undergrupper, "nummerregister" samt "satsförpackningar", vilka här nedan behandlas var för sig.

##### Nummerregister

Nummerregistret är uppställt i tabellform och är uppdelat i tre kolumner: "Det nr", "Grupp" och "Sida".

Nummerregistret kommer särskilt till användning då man endast vet en detaljs nummer och vill ha övriga besrällningsdata.

För att finna ett visst nummer i registret går man till kolumnen "Det nr". Detaljnumren är upptagna i nummerordning. Förekommer tecken eller bokstav framför siffra, gäller beträffande ordningsföljden att tecken gå före bokstäver, vilka i sin tur gå före siffror.

På samma rad som detaljnumret finner man hänvisning till den grupp och sida i katalogen, där ifrågavarande detalj kan ses i sitt sammanhang.

Ofta används en detalj på ett flertal ställen i en konstruktion - särskilt standarddetaljer - och förekommer alltså flera gånger i katalogen. Förekommer en sådan detalj på mer än tre sidor i en och samma katalog är endast den första gruppen och sidan angivna i registret. Detta markeras då med en asterisk \* i omedelbar anslutning till detaljnumret.

##### Satsförpackningar

"Satsförpackningar" är den del av registret som talar om vilka reservdelssatser som förekommer i den eller de vagnstyper som äro behandlade i katalogen.

Går man exempelvis till grupp 6 framaxel, styrning, och söker detaljer för byte av spindelbult, finner man att spindelbultens detaljnummer är märkt med ett "S". Sök då i "Satsförpackningar" efter spindelbultsats, där finner man den sökta satsens komplettnummer.

För erhållande av uppgift på i satsen ingående delar, hänvisas till "Specialkatalogen".

### Förkortningar med förklaringar

#### Förklaringar

På grund av platsbrist vid översättning till fyra språk av anmärkningar i form av noter etc, har ett sammandrag, benämnt "Förkortningar" (se sid 5) iordningställt.

Dessa förkortningar som gäller för samtliga språk och således ej kommer att översättas, har uppställts i alfabetisk ordning, med utgångspunkt från svenska språket. Då noter av s k standardkaraktär använts, som anger chassinr, motornr och karosserinr etc, har dessa utformats enligt följande exempel:

### The appearance of the catalogue

The catalogue is divided into the groups shown on the main register.

There is an index at the beginning of each group.

There is a numerical register and a specification of parts kits at the end of the catalogue.

### The use of the catalogue

If you know where a part is located on the vehicle and want to know its part number, open the catalogue at the relevant group and look for the main unit, to which the part in question is relevant, in the group index. Note! Several varieties of the same unit can appear. When you have found the part concerned on the exploded view note its fig. No. and then find the equivalent fig. number on the text page opposite - where you will find the data relevant for ordering the part.

If you only know the part number and want to find out the rest of the data required for making your order, first look at the numerical register. When you have located the Part No. in the register you will find reference to the Group and Page numbers on the same line. Turn to the page in question and then look down the "Part No." column until you find the part number. The rest of the data on the same line is the data required for making your order.

By comparing the fig. number on the text page with the equivalent fig. number on the illustration you can ascertain the location and function of the part in question.

### What you should know about text pages

A page of text is divided into the columns shown below:

1. "Fig."                      The figure number is a cross reference between the text and the illustration.
2. "Qty."                      The quantity is the quantity of the part concerned in the complete assembly, or subassembly. Occasionally instead of a quantity you will see the designation "erf", which means that you must state the quantity or length you require. In newly edited catalogues the designation "erf", when it concerns piping and hosing which are sold by length, has been replaced by lengths in mm.  
  
In cases of lengths of up to 99 mm you will see, for example, "99 mm", and in cases of lengths exceeding 99 mm the figure will be, for example, just "100" without a suffix. Should piping or hosing bearing the same part number appear in several locations within the same assembly (illustration) then reference is made to the illustration where the length concerned is noted, in parentheses, in the immediate vicinity of the fig. number.
3. "Description"              This column states the name of the part, which shall be used when the part is ordered. If a part is included in a larger unit, it is displaced to the right below the name of the complete unit. When a complete unit is purchased all parts displaced to the right immediately below it, are included when the complete unit is ordered.
4. "Part No."                  The part number must always be quoted in your orders for the part in question.
5. "Notes"                      As well as references to other pages, this column gives clarifying information of various types and, in certain cases, reference to the original manufacturer's designation. A scored part number in this column shows that the part in question has been replaced by another part, the number of which is currently in the part number column. This replacement only concerns the catalogue and component concerned.

Parts which are included in a parts kit are marked with an "S", located immediately to the left of the part number column.

A vertical dash in the left hand margin shows that the part in question has been altered in conjunction with the latest set of catalogue replacement pages.

What you should know about illustrated pages.

The illustrations usually comprise of exploded views in perspective. In certain cases we use plans and sections based on the original drawings. The displacement system used in the text, see point 3, can also be traced on the illustrations owing to the fact that the fig. number of a complete unit is "clamped" together with its component parts. The fig. number of a complete unit has a ring around it.

What you should know about the register

The "Register" group is divided into two sub-divisions, the "Numerical Register" and "Parts Kits". These two sub-divisions are clarified below.

Numerical Register

The numerical register is divided into three columns marked "Part No.", "Group" and "Page". This register will enable you to trace a part in the catalogue when you only know the part number and want further ordering data.

When seeking a certain number in the register, first look at the "Part No." column. The Parts Nos. are listed in numerical sequence. Should a symbol or letter appear before the part number, parts numbers with symbols are listed first, then those with letter prefixes and last parts numbers which are "pure" numbers.

Beside the part numbers reference is made as to which group and page the part in question can be found.

In many cases, an individual part can be found in several parts of the catalogue, especially in the case of standard parts. Should a part be listed on more than three pages in the catalogue, only the initial group and page number are given. Parts of this type are marked with an asterisk.

Parts Kits

"Parts Kits" comprise that sub-division of the register which informs you as to which parts kits are stocked for the types of vehicles listed in the catalogue concerned.

For example, if when looking for parts with which to replace a king pin, in Group 6, you notice that the king pin part number is marked with an "S" look for "King Pin Set" in the Parts Kits Register so that you can get the Kit No. for this set.

If you require knowledge as to the contents of a parts kits, a specification of the individual kits is found in the Special Catalogue.

### Abbreviations and their clarification

#### Clarification

Owing to the amount of space being taken up by the fact that we shall be printing footnotes in four languages, we have tabled a list of "Abbreviations" (see page 5).

These abbreviations, which apply for all languages and thus will not be translated, have been listed in alphabetical sequence, based on the Swedish language. When notes of a "standard" character appear, such as references to certain chassis and engine numbers, etc., they have been formed in the following way:

### Structure du catalogue

Comme il ressort de la page du registre, le catalogue est divisé en groupes. En tête de chaque groupe se trouve une table des matières.

Un registre numérique ainsi qu'une liste des jeux de réparation sont placés à la fin du catalogue. Le registre, la table des matières ainsi que la liste des jeux de réparation sont en cinq langues (suédois, anglais, français, allemand et espagnol).

### Emploi du catalogue

Si on sait où un détail est placé et si l'on veut savoir son numéro de référence etc., on se réfère au groupe auquel le détail en question appartient. A l'aide de la table des matières du groupe, on arrive à l'ensemble complet où se trouve le détail.

Remarque: Il peut exister différents types du même groupe d'éléments. Lorsque l'on a, sur la page d'illustration, trouvé le détail et, de ce fait, son numéro de position, on se réfère au même numéro de position sur la page de texte correspondante où l'on obtient les informations nécessaires pour commander le détail.

Si l'on ne connaît qu'un numéro de référence et que l'on ait besoin des autres informations pour pouvoir passer une commande, il faut se référer au registre numérique. Lorsqu'on a trouvé le numéro de référence dans le registre, on découvre sur la même ligne l'indication référant à un groupe déterminé ainsi qu'à une page. La référence conduit à la page de texte sur laquelle le numéro de référence se retrouve dans la colonne "No de réf". Sur la même ligne que celle où se trouve le numéro de référence, on trouve les autres informations nécessaires aux commandes.

En partant du numéro de position du détail et en se référant au même numéro de position que l'on trouve sur la page opposée d'illustration, on peut savoir où le détail se trouve placé ainsi que connaître sa fonction dans le groupe d'élément.

### Ce que l'on doit savoir de la page de texte

La page de texte est divisée en un certain nombre de colonnes désignées comme suit:

1. "Pos"  
Le numéro de position constitue la relation entre les informations nécessaires à la commande du détail, sur la page de texte, et le détail lui-même sur la page d'illustration.
2. "Antal"  
(quantité)  
Ici se trouve indiqué la quantité d'un détail déterminé entrant dans l'unité immédiatement supérieure. Au lieu d'indications concernant le nombre, il se trouve souvent indiqué "erf" ce qui veut dire "quantité nécessaire" ou longueur nécessaire. En ce qui concerne l'abréviation "erf", lorsqu'il s'agit, par exemple, de conduits et tuyaux emmagasinés qui sont désignés en mètres, les longueurs, dans le nouveau catalogue, sont désignées en mm. Les longueurs ont donc été mentionnées selon l'exemple suivant: A partir de 1-99 mm "99 mm" et à partir de 100 mm et au-delà "100". S'il existe des tubes ou tuyaux de mêmes dimensions en plusieurs endroits dans un même groupe d'installation (voir figure), se référer à la figure où la longueur est indiquée entre parenthèses immédiatement après le numéro de position.
3. "Benämning"  
(dénomination)  
Dans cette colonne est indiquée la dénomination qui doit être employée pour le détail en question lors de commandes.  
Si, un certain détail fait partie d'une unité complète, son nom est mentionné à droite de celui de l'unité complète. Dans l'achat d'unités complètes, les détails mentionnés à droite de celles-ci sont compris.
4. "Det nr"  
(No de réf)  
Le numéro de référence doit être employé non abrégé lors de commandes.
5. "Anmärkning"  
(observation)  
En dehors des références aux pages, cette colonne contient des informations diverses ainsi que, dans certains cas, des informations concernant le numéro de référence des fournisseurs particuliers. Un numéro de référence rayé signifie que le détail a été remplacé par le numéro qui se trouve sur la même ligne dans la colonne des numéros de référence. Ce remplacement ne touche que le catalogue et le numéro de position en question.

Les détails qui entrent dans un emballage de jeux ont été marqués d'un "S". Cette lettre a été placée immédiatement à gauche de la marge gauche de la colonne des numéros de référence.

Un trait vertical dans la marge gauche de la page de texte signifie qu'un changement a été fait lors du dernier remplacement de page.

#### Ce que l'on doit savoir de la page d'illustration

Les illustrations sont en général, des dessins en perspective. Dans certains cas, on emploie des reproductions de plans et de sections. Le système de décalage des numéros indicatifs de pièces, voir page de texte, point 3, a même été appliqué pour les figures en ce sens que le numéro de position d'une unité se trouve à côté d'une accolade réunissant les numéros des pièces composantes.

Une unité complète porte un rond autour du numéro de position.

#### Ce que l'on doit savoir du registre

Le groupe "registre" est divisé en deux sous-groupes: "registre numérique" et "jeux de réparation". Ces groupes sont traités séparément ci-dessous.

##### Registre numérique

Le registre numérique est disposé sous forme de tableau. Il est divisé en trois colonnes: "No de référence", "Groupe" et "Page".

Le registre numérique est principalement employé lorsqu'on ne sait que le numéro de détail et que l'on veut obtenir les autres informations nécessaires pour passer la commande.

Pour trouver un certain numéro dans le registre, on se réfère à la colonne "No de réf". Les numéros de détails sont mentionnés par ordre numérique. S'il se trouve un signe ou une lettre devant un numéro, cela veut dire, en ce qui concerne l'ordre de classement, que le signe passe avant les lettres qui, à leur tour, passent avant les chiffres.

Sur les mêmes lignes que les numéros de référence se trouvent des renvois aux groupes et pages dans le catalogue où le détail en question peut être vu dans son ensemble.

On emploie souvent un détail à plusieurs endroits dans une construction - il s'agit là particulièrement des détails standard. Si un tel détail figure sur plus de trois pages, dans un même catalogue, il n'y a que le premier groupe et la première page de mentionnés dans le registre. Dans ce cas le numéro de détail est suivi d'un astérisque (\*).

##### Jeux de réparation

"Les jeux de réparation" sont une partie du registre qui vient en aide quand on veut savoir quels sont les jeux de pièces détachées existant dans tel ou tel type de véhicule traité dans le catalogue.

Si l'on se réfère, par exemple, au groupe 6, essieu avant et boîtier de direction, et que l'on cherche le détail pour remplacement du pivot de fusée, on trouve que le numéro de référence du pivot de fusée est marqué d'un "S". Il faut donc se référer à "Jeux de réparation" et chercher le jeu de pivot de fusée. En trouvant celui-ci on trouve également le No complet du jeu cherché.

Pour obtenir des informations sur les pièces qui font partie du jeu, il faut se référer au "Catalogue Spécial".

### Abréviations et explications

#### Explications

En raison du manque de place, lors de traductions, en quatre langues, des remarques, il était nécessaire d'employer des "abréviations" (voir page 5).

Ces abréviations qui concernent l'ensemble des langues et, qui par conséquent ne seront pas traduites, ont été disposées par ordre alphabétique en partant de la langue suédoise. Les notes de caractère standard, mentionnant, par exemple, le numéro de châssis, le numéro du moteur, de la carrosserie etc., ont été présentées de la façon suivante:

### Aufbau des Kataloges

Der Katalog ist - wie aus dem Registerblatt hervorgeht - in Gruppen eingeteilt. Vor jeder Gruppe befindet sich ein Inhaltsverzeichnis. Ein numerisches Register sowie ein Verzeichnis über Satzverpackungen finden Sie am Ende des Kataloges.

### Verwendung des Kataloges

Wenn man weiss, wo sich das gewünschte Teil befindet, und wenn man nach dessen Ersatzteilnummer usw. sucht, schaut man unter der Gruppe nach, in der das Teil enthalten sein soll. Mit Hilfe des Inhaltsverzeichnisses der Gruppe sucht man dann die zusammengebaute Einheit, zu der das Teil gehört. ZUR BEACHTUNG! Es können von einem Aggregat verschiedene Ausführungen vorhanden sein. Wenn man auf der Bildseite das Teil und damit dessen Positionsnummer gefunden hat, geht man zu derselben Positionsnummer auf der entsprechenden Textseite über, wo sich die Angaben für die Bestellung des betreffenden Teiles befinden.

Wenn lediglich die Ersatzteilnummer bekannt ist, aber weitere Daten für die Bestellung erforderlich sind, bedient man sich des Nummernregisters. Wenn man die Ersatzteilnummer im Register gefunden hat, erhält man auf derselben Zeile einen Hinweis auf eine bestimmte Gruppe und Seite. Der Hinweis bezieht sich auf die Textseite, auf der die Ersatzteilnummer in der Spalte "Ersatzteilnummer" zu finden ist. Auf derselben Zeile mit der Ersatzteilnummer sind die übrigen Daten für die Bestellung zu finden.

Durch das Verfahren, von der Positionsnummer des gesuchten Teils zu derselben Positionsnummer auf der entgegengesetzten Bildseite überzugehen, erhält man Bescheid über die Anbringung des Teils sowie dessen Funktion in der zusammengebauten Einheit.

### Was man wissen muss über die Textseite

Die Textseite ist in eine Anzahl Spalten mit den folgenden Bezeichnungen aufgeteilt:

1. "Pos" Die Positionsnummer ist die Verbindung zwischen der Bestellangabe eines Teils auf der Textseite und dem Teil selbst auf der Bildseite.
2. "Antal" Hier ist die Anzahl eines bestimmten Teils innerhalb der nächsthöheren Einheit angegeben. Statt Anzahl steht manchmal "erf" und damit ist die erforderliche Anzahl oder Länge gemeint. Bezüglich Bezeichnung "erf", wenn es sich um Rohre oder Schläuche handelt, die pro Laufmeter vorrätig sind, ist diese Bezeichnung in den neuen Katalogen durch Längenangaben in mm ersetzt. Die Längenangabe sind dann z. B. wie folgt angegeben: Ab 1 - 99 mm "99 mm" und ab 100 mm "100". Wenn solche Rohre oder Schläuche von derselben Abmessung auf mehreren Stellen innerhalb derselben Installationsgruppe (Bildabschnitt) vorkommen, wird auf die Abbildung hingewiesen, wo die Länge unmittelbar nach der Positionsnummer in Klammern angegeben ist.
3. "Benämning" In dieser Spalte wird die Bezeichnung, die bei der Bestellung zu verwenden ist, angegeben.  
Wenn ein bestimmtes Teil in einer höheren zusammengesetzten Einheit enthalten ist, ist die Bezeichnung des Teils nach rechts verschoben, und zwar im Verhältnis zu der Bezeichnung der zusammengesetzten Einheit. Beim Kauf der zusammengesetzten Einheit werden auch die Teile, die im Verhältnis zu der zusammengesetzten Einheit nach rechts verschoben sind, mitgeliefert.
4. "Det nr" Die Ersatzteilnummer ist bei der Bestellung ungekürzt zu verwenden.
5. "Anmärkning" Ausser den Seitenhinweisen enthält diese Spalte erklärende Angaben verschiedener Art sowie in einigen Fällen eine Angabe über die Ersatzteilnummer des fremden Unterlieferanten. Eine in dieser Spalte überstrichene Ersatzteilnummer gibt an, dass das Teil durch eine nebenstehende Nummer in der Ersatzteilnummernspalte ersetzt worden ist. Dieser Ersatz bezieht sich nur auf den betreffenden Katalog und die Positionsnummer.

Teile, die in einer Satzverpackung enthalten sind, werden mit einem "S" gekennzeichnet. Diese Bezeichnung ist unmittelbar links vom linken Rand der Ersatzteilnummernspalte angebracht.

Eine senkrechte Linie am linken Rand der Textseite markiert, wo eine Änderung beim letzten Seitenwechsel durchgeführt worden ist.

#### Was man wissen muss über die Bildseite

Die Abbildungen der Bildseite bestehen zum grössten Teil aus Perspektivzeichnungen. In einigen Fällen werden Plan- und Sektionsbilder von der Zeichnungsunterlage verwendet. Das Stufenverschiebungsprinzip, siehe Textseite, Punkt 3, kann man auch in dieser Abbildung feststellen, und zwar weil die Positionsnummer eines kompletten Teils mit einer Klammer die Nummer der Unterteilung schliesst.

Komplette Einheiten werden auch mit einem Ring um die Positionsnummer markiert.

#### Was man wissen muss über das Register

Die "Register" -Gruppe ist in 2 Untergruppen aufgeteilt, und zwar "Nummernregister" und "Satzverpackungen", die hier je für sich behandelt werden sollen.

##### Nummernregister

Das Nummernregister ist in Tabellenform aufgestellt und in drei Spalten aufgeteilt: "Det nr", "Grupp" und "Sida".

Das Nummernregister kommt besonders dann zur Anwendung, wenn man lediglich die Ersatzteilnummer kennt, aber die übrigen Bestelldaten wissen möchte.

Um eine bestimmte Nummer im Register zu finden, sucht man in der Spalte "Det nr". Die Ersatzteilnummern sind in Nummernfolge aufgestellt. Wenn Zeichen oder Buchstaben vor der Ziffer stehen, gilt bezüglich der Reihenfolge, dass Zeichen vor den Buchstaben kommen, die wiederum vor Ziffern kommen.

Auf derselben Zeile mit der Ersatzteilnummer findet man auch einen Hinweis zu der Gruppe und Seite, wo das betreffende Teil in seinem Zusammenhang zu finden ist.

Oft wird ein Teil auf mehreren Stellen in einer Konstruktion - besonders Standard - angewandt, und kommt somit mehrere Male im Katalog vor. Kommt ein solches Teil auf mehr als drei Seiten vor in einem Katalog, sind lediglich die erste Gruppe und Seite im Register angegeben. Dies wird dann mit einem Sternzeichen (\*) im unmittelbaren Anschluss zur Ersatzteilnummer angegeben.

##### Satzverpackungen

"Satsförpackningar" ist der Teil vom Register, aus dem hervorgeht, welche Ersatzteilsätze in den in diesem Katalog behandelten Wagentypen vorkommen.

Nimmt man z. B. Gruppe 6, Vorderachse, Lenkung, und sucht Teile zum Auswechseln von Achsschenkelbolzen, findet man, dass die Ersatzteilnummer des Achsschenkelbolzens mit einem "S" gekennzeichnet ist. Sucht man dann unter "Satsförpackningar" nach dem Achsschenkelbolzensatz findet man die komplette Satznummer.

Um über die zum Satz gehörenden Teile Auskunft zu bekommen, verweisen wir auf "Specialkatalogen".

### Abkürzungen mit Erläuterungen

#### Erläuterungen

Durch Platzmangel bei der Übersetzung der Anmerkungen in vier Sprachen in Form von Abkürzungen haben wir eine Zusammenfassung, bezeichnet "Abkürzungen" (s. Seite 5), eingeführt.

Diese Abkürzungen, die für sämtliche Sprachen gelten, werden somit nicht übersetzt und sind alphabetisch aufgeteilt mit Ausgang von der schwedischen Sprache. Sogenannte Normbezeichnungen wie Fahrgestell-Nr., Motor-Nr., Karosserie-Nr. usw. sind wie folgende Beispiele verwendet worden:

### Estructura del catálogo

El catálogo está dividido en los grupos que se desprenden de la hoja de registro.

Al comienzo de cada grupo existe un índice.

Al final del catálogo se encuentra un registro numérico y una especificación de los empaques por juegos.

### Empleo del catálogo

Si se desea saber donde un detalle se encuentra colocado y cual es su número de detalle etc, se busca el grupo al cual el detalle pertenece. Con la ayuda del índice del grupo se busca luego la unidad completa de la cual el detalle forma parte. Nota! Pueden existir distintas variantes del mismo grupo o elemento. Una vez que se ha localizado el detalle en la página ilustrada y consecuentemente el número de posición del detalle, se busca el número de posición en la página de texto correspondiente, donde se obtienen las informaciones necesarias para el pedido del detalle.

Si únicamente se conoce el número de un detalle y se desea saber los datos restantes para su pedido, se emplea el índice numérico. Una vez que se ha encontrado el número del detalle en el índice, se localiza en el mismo renglón el grupo y la página donde se encuentra el detalle en cuestión. La referencia nos lleva a la página de texto en la cual el número de detalle se encuentra en la columna "Nro. de detalle". En el mismo renglón que el número de detalle se encuentran las informaciones necesarias para su pedido.

Buscándose el número de posición del detalle en la página ilustrada opuesta, se sabe la ubicación del detalle como asimismo su función en el grupo al cual pertenece.

### Lo que se debe saber referente a la página de texto

La página de texto está dividida en un cierto número de columnas denominadas de la siguiente manera:

1. "Pos"  
El número de posición constituye la relación entre los datos de pedido de un detalle en la página de texto y el detalle propiamente dicho en la página ilustrada.
2. "Antal"  
(Cantidad)  
Aquí se indica la cantidad de un detalle determinado que entra en la unidad inmediata superior. En lugar de la cantidad ponemos a veces "erf" = cantidad necesaria o longitud necesaria. Referente a la palabra "erf", cuando se trata por ejemplo de tubos o mangueras que tenemos en existencia por metro, la hemos reemplazado en los catálogos nuevos por las longitudes correspondientes expresadas en milímetros. Las longitudes se han expresado entonces de acuerdo a los siguientes ejemplos: entre 1-99 milímetros "99 mm" y a partir de 100 milímetros y más "100". Si existen tubos o mangueras de la misma dimensión en distintos lugares en un mismo grupo de instalación (véase fig.), hacemos referencia a la figura donde la longitud es indicada entre paréntesis en combinación con el número de posición.
3. "Benämning"  
(Denominación)  
En esta columna se indica la denominación que debe emplearse para los detalles al formularse órdenes de pedidos.  
Si un cierto detalle forma parte de una unidad completa, la denominación del detalle está desplazada hacia la derecha en relación a la denominación del grupo completo. Al comprarse el grupo completo, los detalles que se encuentran desplazados hacia la derecha son suministrados automáticamente.
4. "Det nr"  
(Nro. de detalle)  
El número de detalle debe ser empleado en forma completa al formularse órdenes de pedido.
5. "Anmärkning"  
(Observación)  
Además de las referencias a las páginas, esta columna contiene datos informativos de distintas clases y en ciertos casos también informaciones de los números de detalle de proveedores particulares. Un número de detalle tachado en esta columna, indica que el detalle ha sido reemplazado por el número de al lado de la columna del número de detalle. Este reemplazo rige únicamente para el catálogo y la posición correspondientes.

Los detalles que forman parte de un empaque por juego se han marcado con una "S". Esta se ha colocado inmediatamente a la izquierda del margen izquierdo de la columna del nro. de detalle.

Una raya vertical en el margen izquierdo, indica donde se ha realizado una modificación al realizarse el último cambio de página.

#### Lo que se debe saber acerca de la página con ilustraciones

Las ilustraciones se han generalmente diseñado con un dibujo en perspectiva. En ciertos casos se emplean planos y figuras de secciones. El principio del desplazamiento, véase la página de texto, punto 3, puede también ser identificado en la figura, ya que el número de posición de la unidad completa abarca los detalles componentes por medio de un corchete.

Una unidad completa se marca también con un anillo alrededor del número de posición.

#### Lo que se debe saber acerca del registro

El grupo "registro" está dividido en dos subgrupos, es decir "índice numérico" y "empaques por juegos", los cuales a continuación son tratados por separado.

#### Índice numérico

El índice numérico está realizado en forma de tabla y ha sido dividido en tres columnas:

"Nro. de detalle", "Grupo", y "Pág."

El índice numérico se emplea principalmente cuando solamente se sabe el número de un detalle y se desea saber los restantes datos de pedido.

Para encontrarse un número determinado en el índice, se busca la columna "Nro. de detalle". Los números de detalles están anotados en orden numérico. Si existen signos o una letra delante de un número, rige referente al orden, que el signo es colocado delante de las letras, las cuales a su vez se colocan delante de los números.

En el mismo reglón que en el número de detalle se encuentran las referencias al grupo y la página en el catálogo donde el detalle correspondiente puede ser visto en su relación.

Sucede a menudo que un detalle es empleado en distintas páginas de una misma construcción, especialmente cuando se trata de detalles standard, por lo cual está repetido muchas veces en el catálogo. Si un detalle de esta naturaleza existe en más de tres páginas en un mismo catálogo, se ha incluido únicamente el primer grupo y la primer página en el índice. Este se marca entonces con un asterisco (\*) en combinación directa con el número de detalle.

#### Empaques por juegos

"Los empaques por juegos" es la parte del índice que nos dice cuales son los juegos de piezas de repuestos que existen en el catálogo o los tipos de vehículos tratados en el mismo.

Si por ejemplo tomamos el grupo 6 eje delantero, dirección, y buscamos detalles para el cambio de perno pivote, encontramos que el número de detalle del perno pivote está marcado con una "S". Si entonces miramos en "Juegos por empaque" veremos que en el juego correspondiente se encuentra el número de detalle del juego completo del perno pivote.

Para saberse los detalles que forman parte del juego, hacemos referencia al "Catálogo especial".

### Abreviaciones con explicaciones

#### Explicaciones

Debido a la falta de espacio al realizarse la traducción a cuatro idiomas de observaciones en forma de notas etc, hemos realizado una recopilación con resumen denominada "Abreviaciones" (véase pág. 5).

Estas abreviaciones que rigen para todos los idiomas y por lo tanto no serán traducidas, han sido colocadas en orden alfabético en base al idioma sueco. En los casos en que se emplean notas de caracter standard que indican por ejemplo el número del chasis, el número del motor, el número de carrocería etc, estas han sido preparadas de acuerdo al siguiente ejemplo:

3. Monteras vid byte av enstaka satser. Vid byte av samtliga satser skall det nr enligt notsiffra 2 beställas.  
Install in conjunction with replacement of single kits. When changing all kits, part according to footnote 2 should be ordered.  
Est monté lors d'échange de jeux isolés. Lors de remplacement de tous les jeux, le numéro correspondant au chiffre 2 de la note doit être commandé.  
Beim Auswechseln einzelner Sätze einzubauen. Beim Austausch sämtlicher Sätze ist die Nummer lt. Fussnote 2 zu bestellen.  
Se monta al cambiarse juegos parciales. Al realizarse el cambio de todos los juegos, se debe solicitar el nro. indicado en la nota 2.
4. För öd upp till 0,010" använd kolvringsats med expand ringar 277071-7.  
For os up to 0.010" use piston ring kit with expanding rings 277071-7.  
Pour p m h jusqu'à 0,010" on emploie le jeu de bagues de piston avec bague d'expansion 277071-7.  
Für Übergösse bis zu 0,010" ist Kolbenringsatz mit Expansionsringen 277071-7 zu verwenden.  
Desplace el punto muerto superior a 0,010", emplee el juego de gros de pistón compuesto por aros expansores 277071-7.

4. Beakta att främre och bakre förgasare skall vara försedda med samma bensinregleringsnål.

Both forward and rear carburetters shall be fitted with jet needles of the same type.

Contrôler que les carburateurs avant et arrière sont bien équipés de la même aiguille de réglage d'essence.

Beachten, dass sowohl der vordere als auch der hintere Vergaser mit der gleichen Kraftstoffnadel versehen sein müssen.

Tengo presente que ambos carburadores deben estar provistos de idénticas agujas reguladoras de combustible.

- Beakta att främre och bakre förgasare skall vara försedda med samma bensinregleringsnål.  
Both forward and rear carburettors shall be fitted with jet needles of the same type.  
Contrôler que les carburateurs avant et arrière sont bien équipés de la même aiguille de réglage d'essence.  
Beachten, dass sowohl der vordere als auch der hintere Vergaser mit der gleichen Kraftstoffnadel versehen sein müssen.  
Tenga presente que ambos carburadores deben estar provistos de idénticas agujas reguladoras de combustible.

1. Bakaxelväxel med rund medbringare. Ers: Tid förekommande bakaxelväxel med kloformad medbringare samtidigt skall medbringare 653098-4 monteras.  
Differential carrier with companion flange. Replaces early production differential carrier with yoke, companion flange  
653098-4 shall be fitted simultaneously.  
Couple conique avec flasque rond. Remplace ancien couple avec accouplement à griffes. En même temps le flasque 653098-4 doit être monté.  
Ausgleichgetriebe mit rundem Antriebsflansch. Ersetzt die frühere Ausgleichgetriebe mit klauen Antriebsflansch .  
Gleichzeitig ist Mitbringer 653098-4 einzubauen.  
Puente trasero con brida de acoplamiento redonda. Sustituye al puente trasero de producción anterior con brida de acoplamiento tipo garra. Al mismo tiempo se debe montar la brida de acoplamiento 653098-4.
